

RICHWAY DETOX*i*

**HEATED 9 TIMES
FOR 20 HOURS AT 3000°F
SUPERIOR QUALITY IONIZED SALT**

When the human body maintains 0.9% salinity, our blood becomes clean, and our bodies become warm. Detoxi is ionized and fully absorbed into the body, creating healthy cells through human body cell adhesion and enhancing the benefits of body heat through far infrared rays.

Utilization of DETOXI

Richway Detoxi salt is made by using an ancient process that originated thirteen hundred years ago from a Buddhist temple in Korea. Natural sun-dried salt is packed inside hollow sections of bamboo and heated 9 times for 20 hours at 3000°F with pure yellow ochre.

This process produces a pure grade of salt that contains numerous essential minerals and micronutrients such as zinc, magnesium, and potassium.

Detoxi has high levels of phosphorus, zinc, and ionized hydrogen. Its outstanding antioxidant features provide nutrients by cleaning and controlling our bodies without side effects. The product neutralizes toxins, increases the absorption rate of nutritional contents up to 10 times, and can be used along with other health food products.

Osmosis Pressure Balance

Research at the Korean Health Institution shows the effects of Detoxi salt balancing osmotic pressure and controlling blood pressure levels. Highly alkaline Detoxi salt supports higher pH blood levels and balances blood salt levels, which produces very important health benefits.

pH Balance

Richway Detoxi salt balances the essential ratio of trace elements and the pH of body fluid. Germs cannot survive in human blood with a pH value of 7.35~7.45. Richway Detoxi salt has a pH of 7.5, higher than ordinary salt.

DETOXI SUGGESTED USAGE

- ▶ The suggested amount to consume is 1 spoonful (provided) in an 8 oz cup of water:
 - Before thermotherapy
 - Before going to sleep and on an empty stomach in the morning
 - Thirty (30) minutes before each meal, up to three (3) times a day
 - Do not consume Detoxi without adequate fluid.
- ▶ This product brings out pure flavor when used with fruits and green vegetables.
- ▶ Your skin will gain elasticity by dissolving 1 spoonful (provided) of Detoxi in a spray bottle and spraying it onto skin after washing. Spraying the dissolved product onto the head before sleeping also helps with hair growth.

Actual Production Picture

Detoxi Manufacturing process

Natural sun-dried salt is heated 9 times for 20 hours at 3000°F, resulting in salt that is free from impurities.

Heated at over 3000°F in the salt blast furnace

Maintained in a liquid state up to 9 times

The clean and pure upper layer is extracted

Product is safely film wrapped after decomposition to avoid endocrine-disrupting chemicals

RICHWAY DETOXI

The effects of Detoxi salt

Detoxi salt helps with decontamination, metabolism, discharge of bodily waste, sterilization, cell restoration, and the increase of red blood cells amongst other things. It also acts as an antibiotic and anti-inflammatory.

Creating the highest quality Detoxi salt

Richway's Detoxi salt is created by packing natural sundried salt into the hollow sections of 3 year old bamboo trees with pure yellow ocher and burning it 9 times for 20 hours at 3000°F. This extreme heat process eliminates toxins and chemicals (magnesium chloride) in salt. This process results in Detoxi salt that contains reduced sodium, increased chloride, various minerals, and the ability to stabilize osmotic pressure.

Iron and Oxidation Test

Sun-dried Sea Salt vs. Detoxi Salt: Salt water with 19% salinity
 ▶ Test date: December 20, 2011
 ▶ Observation progress report after 7 months of testing

Sun-dried Sea Salt <ORP level: 116>

There is a large amount of residue and the degree of iron corrosion is very severe.

Detoxi Salt <ORP level: -420>

Oxidation has not occurred and the water is clear.

FEATURES OF DETOXI IONIZED SALT

Toxins within pure salt are eliminated when heated 9 times for 20 hours at 3000°F, changing it into ionized salt. This ionized salt is Detoxi.

1 Maintains the Balance of Minerals and Nutrients in the Body

Salt is the treasure of trace elements. Detoxi salt contains numerous essential minerals and micronutrients such as zinc, magnesium, and potassium.

2 Maintains the Balance of Body Energy

Detoxi helps greatly in balancing and maintaining body energy levels. Detoxi salt absorbs and stores a vast amount of energy during the high heating and fast cooling process. Therefore, consuming Detoxi salt will cause energy to be released in the human body revitalizing cells and internal body organs, enhancing the overall immune system.

3 Cleansing of Blood Vessels and Maintaining the Homeostasis of Blood

This salt not only eliminates impurities in capillaries, arteries and veins but also prevents the decomposition of blood, maintaining the 0.9%

salinity of blood homeostasis. In addition, materials such as gas, bittern, and heavy metals that contaminate the blood are extracted and discharged, changing the color into a clear scarlet.

4 Detoxi and Biomat - High Temperature Far Infrared Ray Care

What happens when the Biomat is used at a high temperature after taking Detoxi salt with water?

Detoxi salt prevents dehydration during thermotherapy by increasing the reverse osmosis pressure of the kidneys and assisting in discharging toxins through sweat and urine. In addition, the necessary salinity of the human body is adjusted, making sure that abundant amounts

of electrolytes remain within the body.

✓ The far infrared rays of the Biomat permeate deep into the body, increasing the discharge of sweat. Therefore, it is important to consume this product with water before using the Biomat to prevent dehydration.

The Difference between Detoxi and Ordinary Salt

Salt is not merely a seasoning, but a necessary nutrient. Long term inadequate salt intake can cause general body weakness, dizziness, edema, muscle spasm, dehydration, and heart problems, amongst other problems that are medically related to salt depletion. Prevent salt depletion by understanding the difference between Detoxi and ordinary salt.

	Ordinary Fine Salt	Detoxi Salt
Processing	Electrolysis	Heated 9 times for 20 hours at 3000°F
Content	Sodium Chloride with 99.5% purity	Low sodium and high chloride / Natural product containing various nutrients and 22 trace elements
pH Level	Acidity - pH 6.3	Strong Alkalinity - pH 7.5
Taste	Strong salt taste	Weak salt taste
Effect	Harmful High blood pressure and blood sugar level Causes illnesses	Harmless to the human body / Controls blood pressure and blood sugar levels / Eliminates and neutralizes toxins Supplements the essential trace elements Improves the defense system of the body
